COLD DRIP COFFEE

We have three choices of cold drip coffee on offer, produced fresh daily from our own cold drip coffee makers and bottled individually. Its complex taste is accentuated through the cold drip process and can be easily differentiated from a traditional hot brew.

Cold drip is a healthier choice, too. It is a less acidic brew that is soft on the digestive system. Secondly, as it has a smooth taste there is less of a need to add other ingredients like milk and sugar to neutralise the acidity.
